Re: E.L. Harvey- Long Term Monitoring Plan

The Board of Health (the Board) at their regularly scheduled meeting on July 8, 2004 voted 2-1 to approve the Long Term Monitoring Plan as outlined in a memo to the ZBA dated June 29, 2004 from Jesse Schwalbaum of Earth Tech.

In past correspondence, Jesse Schwalbaum has also recommended to the Board that the Long Term Monitoring Plan take into consideration the analytical results from the monitoring wells at the Westborough landfill. As of this time, The Board has not received such results from the applicant, but would like to present the ZBA with an approved Long Term Monitoring plan in a timely manner.

Board member David Edson's dissenting vote was based on no indication that the applicant has endorsed the monitoring plan, no financial mechanism for the Board to review analytical data (which could result in an unfunded liability), and the use of certain on-site wells that show contamination from other potential sources.
